Lab Enablement Leadership as Data Innovations Celebrates 30th Anniversary

South Burlington, VT - Lab enablement solutions industry leader, Data Innovations, celebrates their 30th anniversary. Founded as the lab industry's first middleware provider with its flagship Connectivity solution, Data Innovations has continued to evolve as the clinical lab's go-to technology platform for lab optimization, standardization, and workflow automation.

"For more than 30 years, Data Innovations has empowered labs to optimize patient care through transformative laboratory enterprise management solutions," said Premila Peters, President, Data Innovations. "Our current solutions and our forward-looking innovation – combined with our deep lab expertise and commitment – will deliver even more value to clinical labs over the next 30," said Peters.

Data Innovations provides vendor-neutral software and solutions for clinical labs to optimize performance across all disciplines. With key solutions spanning lab connectivity, productivity, quality, performance and reliability, and analytics, Data Innovations is credited with establishing the lab enablement software space, and driving vendor-neutral solutions within and across labs.

They are a global software company, serving 6,000+ hospitals and laboratories in 85+ countries.
